## Metadata

---

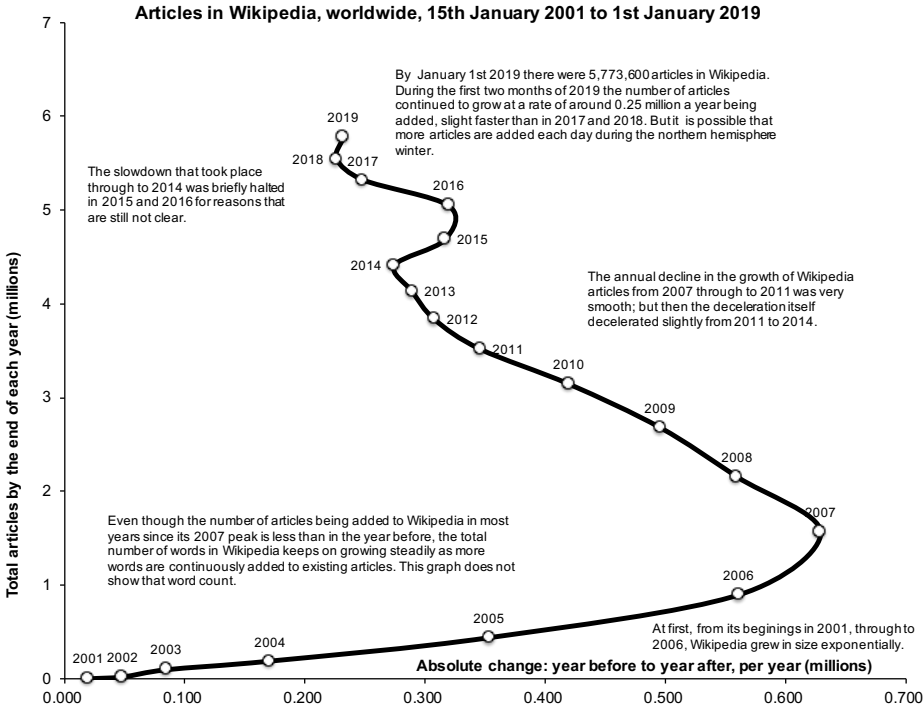

These reference tables contain statistics of different forms of 'new data'. These 'new data' include Wikipedia, domain names and social media users. Specifically, we include the 'new data' in China, which are domain names in China and the users of the Chinese version of Twitter. The graph beside each table shows the total amount of new data, and the absolute change over time. The x-axis is the absolute change while the y-axis is the total amount. Each circle represents a certain year.

---

Number of articles in Wikipedia and its absolute change, worldwide, 2001-2019, (millions)
