## Metadata

---

These reference tables contain statistics of the fertility rate in four countries in Southern Europe since 1960. The tables also compare the data from the World Bank, and the United Nation’s World Population Prospects reports in 2017 and in 2019. The graph besides each table shows the fertility rate of that year, and the absolute change over time. The x-axis is the absolute change while the y-axis is the total fertility rate. Each circle represents a certain year.

All four countries here have seen dramatic decline in fertility rate.

---

Total fertility rate, Portugal, 1960-2016, (children per woman)
