# Metadata

These reference tables contain statistics of the GDP per capita worldwide and in different regions (which correspond to Fig47, the only difference is that here we use log scale, and relative change). In the World-estimated, the graph is the one that you see in the book, which was written before July 2019. The World-UN is given here as we later accessed the data again and found UN has revised the old data and released new data as well. However, the UN data do not report the GDP per capita for Western Asia, and Africa. Hence for these two regions, the timeline ends at 2016. Although the UN data do not report the GDP per capita for Western Europe as well, they give some information on the European Union, and this information is used to estimate the 2017 and 2018 GDP per capita for Western Europe. The graph besides each table shows the GDP per capita of that year, and the absolute change over time. The x-axis is the absolute change while the y-axis is the GDP per capita. Each circle represents a certain year.

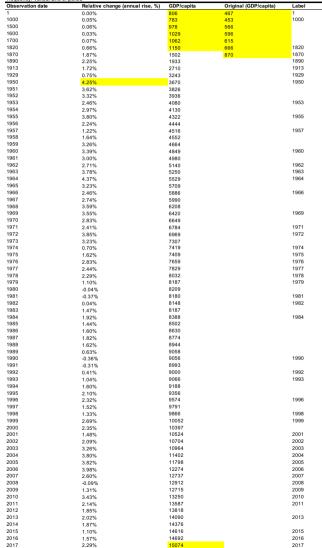

GDP per capita, real mean annual average, constant 2011 US\$, worldwide, log scale, 1-2018, (GDP/capita)

Source: Maddison Project Database, version 2018. Jutta Boit, Robert Inklaar, Herman de Jong and Jan Luiten van Zanden (2018); https://www.ng.ni/ggdc/historicaldevelopment/maddison/releases/maddison-project-database-2018; 11 May 2019

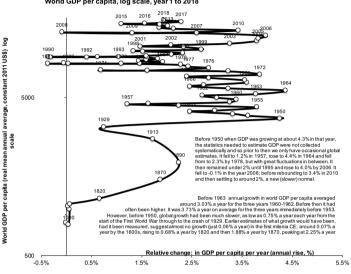

Notes 1. Data before 1870 were retrieved from the Maddison Project Database version 2010. These data are based on 1990 International Geany-Khamris dollars, which are different from the data after 1870 which are based on 2011 US dolars. Hence we have adjusted the data before 1870 by using the 1870 as the base and keeping the proportional relationships for years before 1870.

Notes 2: 2017 data are added using change from 2016 according to World Bank estimate of GDP per capita, PPP (constant 2011 international dollars) (https://data.worldbank.org/indicaton/NY.GDP.PCAP.PP.KD?end=2018&start=1990&wiew=chart)
Notes 3: 2018 data are added using IMF datamapper estimate of change between 2018 and 2019 in GDP per capita at current prices (https://www.imf.org/external/datamapper/NGDPDPC@WEO/USA/DEU/MEO/WORLD)

Frequency: Varied, End of period
