Metadata

These reference tables contain statistics of the life expectancy worldwide and in the UK, USA, Japan and China since 1950. The graph besides each table shows the life expectancy that year, and the absolute change over time. The x-axis is the absolute change while the y-axis is the life expectancy. Each circle represents a certain year.

It should be noted that the UK and USA shared a similar scale in the growth of life expectancy, the scale in China is five times that in the UK and the USA.
